

Dina Workshop
Danish Agricultural Advisory Centre
26 February 2003, 10 – 16

Decision support and farmers

The objective of the workshop is to discuss Danish implementations of decision support to farmers in the light of the conceptual framework developed in *Agricultural Systems* 74 (2002), and in the light of practical experiences in applying new approaches to decision support in Australia and in The Netherlands.

The workshop is attended by a small, invited audience and will be conducted in an informal way with discussions during and between the presentations.
